Foot & Ankle Orthotics

Foot and Ankle Orthotics

CK -303 Tour Quick-Lace[®]

L1902

Designed to aid patient in chronic ankle instability and the prevention of acute ankle sprains, the **Tour Quick-Lace Ankle Brace[®]** is perfect for immobilization during rehabilitation as well as prophylactic use. The figure-8 design mimics ankle taping by providing inversion/eversion support. The wide elastic cuff closure provides added stability and compression, while the breathable tongue and heel help keep wearers cool and dry. Fits left or right foot.

L1906

The **VertaLoc[™] Active Ankle Brace** was designed to provide maximum support due to injury and instability of the ankle and foot. The brace controls position and motion of the ankle, immobilizes the ankle and lower leg for patients with arthritis and fractures. The complete closure system ensures the ankle is secure with a comfortable fit. Low-profile design offers comfortable fit in shoe. Great support for acute & chronic ankle sprains, ankle instability, posterior tibial tendonitis, osteoarthritis, etc.

VertaLoc[™] Active Ankle Brace

VertaLoc[™] Pro Ankle Brace

L1971

The **VertaLoc[™] Pro Ankle Brace** provides maximum support to an injured ankle and foot. The Pro ankle brace has an extension that runs from the ankle to near the top of the calf, which helps with instability and injury of the ankle and foot. The brace controls position and motion of the ankle by immobilizing the ankle and lower leg for patient with arthritis and fractures. The complete closure system ensures patient's ankle is secure and provides a comfortable fit. Similar to the Active Ankle, the Pro offers a more rigid design offering optimal support. Great support for acute & chronic ankle sprains, ankle instability, posterior tibial tendonitis, osteoarthritis, etc.

CK-289: Comfortmx AFO

L195I

Indicated for peroneal paralysis, ankle-joint arthritis, and post-operative Achilles treatment. The **Comfortmx AFO** limits plantar movement and provides a high energy return.

FEATURES: Lightweight, carbon fiber construction; simple strapping system for easy application and adjustment; can handle weights up to 285lbs.

L197I

A low-profile and lightweight brace that utilizes rigid medial and lateral uprights to prevent eversion and inversion for more stability during activity. Provides a foundation for injury prevention, treatment & protection. Functional hinge design allows for utilization of the brace prophylactically, after acute injuries and during rehabilitation. Simple front closure application and adjustable calf cuff creates a better fit and reduces inventory. Specially designed softgoods eliminate irritating pressure on the ankle and footplate material is heat formable for a "custom" fit.

CL-301: Accord Ankle III

Actimove[®] Walker

L4360 / L4361 - Pneumatic: L4386 / L4387

The modern alternative to casting. Suitable for the post-op-treatment following severe ankle injuries and after fractures of the foot and ankle, the **Actimove[®] Walker** comes in a Standard and Air version with an integrated pump and valve system. Also available in Non-Pneumatic.

FEATURES: Criss-cross ankle straps immobilize foot in walker. Hook and loop strapping system provides adjustable, removable custom fit without sacrificing stability and support.

Knee Braces & Support: Functional Knee Braces

DCT-1012 Trend Pro Fit Hinged

L1810 / L1812

Indicated for mild to moderate ligament/joint pain, sprain/strains of the knee ligaments; patients needing to stabilize the knee joint following sprains and ligament pain/or meniscus injuries.

L1820

Indicated for mild to moderate ligament/joint pain, sprain/strains of the knee ligaments; patients needing to stabilize the knee joint following sprains and ligament pain/or meniscus injuries.

FEATURES: medial and lateral hinge stays, a wrap-around style which allows for ease of application and adjustability, a neoprene 4-way stretch nylon fabric, and tapered comfort fit back.

CK-108 Hinged Wrap-Around

DCT-002 Trend ROM Hinged

L1832 / L1833

This brace is built for optimal support and patient comfort. This brace uses a breathable advanced fabric to make it extremely light weight and breathable. The fabric also incorporates a moisture wicking design to keep the area cool at all times. The straps on the brace also have a rubber tab at each end making it easier for patients to don and doff. This brace is not only extremely supportive and patient compliant but it also has a cool design that patients won't mind wearing.

DCT-O32 Trend ROM Universal Hinged

L1832 / L1833

The highly patient compliant **Trend ROM Universal Hinged Knee Brace** is built for optimal support and patient comfort. This brace uses a breathable advanced fabric to make it extremely light weight and breathable. The fabric also incorporates a moisture wicking design to keep the area cool at all times. The straps on the brace also have a rubber tab at each end making it easier for patients to don and doff. This brace is not only extremely supportive and patient compliant but it also has a cool design that patients won't mind wearing. A universal design that can dramatically reduce your inventory needs.

L2397

The **Trend Universal Suspension Sleeve** is used in addition to the L1832/L1833, the L1843/L1851, or the L1845/L1852 for patients that desire additional support.

This sleeve also helps the knee brace for migrating on the patients knee and can also assist in the prevention of skin irritation.

DCT-2397 Universal Suspension Sleeve

Model	Size
DCT-002-2	Small (Less than 18" thigh)
DCT-002-3	Medium (18" - 21" thigh)
DCT-002-4	Large (21" - 24" thigh)
DCT-002-5	X-Large (24" - 27" thigh)
DCT-002-6	XX-Large (27" - 30" thigh)
DCT-002-7	XXX-Large (30" - 35" thigh)
DCT-O32	Universal (Up to 28" thigh)

Same Sizes Apply TO DCT-1012

Knee Braces & Support: Ligament Braces

CK-207 Comfortland ACL Hinged

L1845 / L1852

Designed to provide stability and support following injury or reconstruction of the ACL, PCL, MCL, and LCL, the **CK-207** features a lightweight, sturdy frame lined with durable, soft goods for the combination of optimum support and comfort.

The user-friendly ROM hinge helps patients easily and quickly adjust the desired range of flexion and extension, making it the perfect brace for those active patients needing additional support during recovery.

L1830

The **Universal Tri-Panel Knee Immobilizer** is a great choice for patients who require full knee immobilization. It is also perfect for ACL, MCL, PCL as well as soft tissue injuries.

The tri-panel is fully adjustable to accommodate a wide variety of thigh and calf sizes, and is available in lengths ranging from 16"-24".

CK-150 Universal Tri-Panel Immobilizer

DCT-3233 Trend Recoup TROM

L1832/ L1833

The **Trend Recoup TROM** is designed for knee immobilization following surgery. It features an easy to use telescoping system along with independent strapping to provide a custom fit to patients of nearly every size and shape.

The quick-release straps make it simple for patients to don/doff the brace, and the easy to use ROM hinge can be set to completely lock out the knee or limit desired flexion/extension. The soft "grip" padding makes this brace comfortable to wear all day and helps limit migration and rotation.

L1845

This premium quality knee brace is for patients who have experienced ligament injuries and/or reconstructive surgery. Similar to the Rebel Ligament, the **Rebel Bold** offers the same lightweight aluminum frame with Townsend Motion TM+ Hinge system and Flexion & Extension stop kits, but designed for a more cost-effective budget.

Size	7" Above Knee	M - L Width	7" Below Knee

Knee Braces & Support: Osteoarthritis Braces

DCT-090I Trend Pro Fit Unloader

L1843 / L1851

The perfect brace for patients with mild to moderate osteoarthritis. This brace features a low profile single upright design that is easily customizable to every patient.

This brace also has an easy to use unloading mechanism and numbered strapping system for easy application. Its universal design allows for less inventory and size adjustability.

L1843 / L1851

A very low profile single upright OA knee brace which offers optimal support and comfort for patients with mild to moderate medial OA. This semi-malleable shell forms to normal and disproportional size legs.

- Snug comfortable fit preventing brace migration
- Easy-to-use thumb dial to increase correction 0-20°
- Hinge offers Townsend roll-and-glide motion
- Adjustable soft strap system

3 (XL-XXL)	23 1/2 - 28 inch	17 - 19 inch

Active Reliever Knee Brace

LI843

A premium soft-shell OA knee brace used for unicompartment osteoarthritis, articular cartilage defect repair, meniscal cartilage repair or osteochondral defect repair.

- Breathable, moisture-wicking fabric
- Anatomically correct roll-&-glide Townsend motionhinge w/ adjustable ROM stops
- Semi-rigid, self-contouring nylon superstructure sewn in
- Patient-friendly quick release buckles
- Medial or lateral OA; left or right hinge position

LI845

This premium double upright OA knee brace is exactly what the patient & physician want! For patients diagnosed with mild to moderate medial or lateral OA, as well as patients who have OA in combination with ligament instability.

- Rigid aircraft aluminum frame
- Extremely comfortable, lightweight, and sleek look
- Patented adjustable loadshifters
- Townsend Motion TM5+ hinges
- Flexion & Extension stops

Upper Extremities

811-020181 Ventaloc® Elbow Brace

L3760 / L3761

Designed to assist in protecting and supporting sore, weak or injured elbow and arm. It holds the elbow in an optimal position to encourage healing and alleviate pain.

- Provides comfort & support for injured or weak elbows
- Assists to relieve pain caused by arthritis or tendonitis
- Improves recovery post-op OR in place of surgery

SIZE	DESCRIPTION	SKU#
Universal	Elbow Right	811851-020181
Universal	Elbow Left	811851-020198

L3960

The new, patented **VSL-747: V-Sling Shoulder Immobilizer's** airplane design provides adjustable immobilization for patients recovering from shoulder procedures where maximum support and relief is required.

The **VSL-747** also features an adjustable and removable platform combined with a universal abduction base that makes it easy to adjust and set.

VSL-747: V-Sling Immobilizer

DCT-3916 Trend Pro Wrist

L3915 / L3916

An ideal product for carpal tunnel syndrome and other wrist/hand ailments. The **Trend Pro Wrist** offers an adjustable ROM hinge to set flexion/extension. Traditional wrist braces "cock-up the wrist," pressuring the median nerve and causing more pain for patients with carpal tunnel.

A quick lace closure system and a malleable frame allow the brace to conform to any patient. A nylon glove adds compression and warmth to the wrists/hand to promote blood flow. Save space with universal sizing & ambidextrous design.

SS-158 ABD Shoulder Pillow & Ball

L3670

The **ABD Shoulder Pillow & Ball** features a universal size to fit most patients that is easy to use and adjust. It can be worn on the left or right shoulder and its lightweight design provides comfort for extended wear.

The provided stress ball is used in helping stimulate blood circulation without movement of the arm and shoulder. This product is intended for post-operative and post-trauma immobilization, rotator cuff injuries, soft tissue repairs, and shoulder instabilities.

L3908: 3I-109-L / 3I-109-R

The **Endeavor Quick-Lace Wrist Extension Splint** is a great aid in the treatment of carpal tunnel syndrome, tendonitis, soft tissue injuries, as well as mild sprains of the wrist. It's lightweight material enhances the wearer's comfort while the quick-lace system ensures easy application as well as optimal support and compression. The breathable lycra lining of this splint promotes maximum ventilation while the precisely- sculpted, narrow webspace prevents pinching. One Size Fits All for the left or right wrist.

Endeavor Quick-Lace Wrist Extension

DCT-200 Trend 8" Wrist/Thumb Splint

L3807 / L3809

The **Universal DCT-200's** low profile and lightweight design features a breathable four way stretch material that provides patients with superior comfort and compliance. This brace has removable/adjustable thumb and palmer stays that gives patients the support they need.

The D-ring closures make application and removal easy for anyone. The **DCT-200's** design is ideal in treating De Quervain's syndrome, Gamekeeper's Thumb, and carpometacarpal instabilities.

Spinal Support & Traction

Spinal Support & Traction

SUPERIOR QUALITY, COMFORT & PERFORMANCE:

The Trend Lines of Braces offer a revolutionary light-weight, breathable design with built-in, low-profile anterior panel and contoured, padded posterior panels for optimal comfort and support when sitting or standing.

INDUSTRY CHANGING DESIGN

Allows patients to control a desired amount of pressure and "hydrostatic lift" which is extremely effective in reducing back pain, offering patients support & pain relief that is unmatched by any other LSO on the market

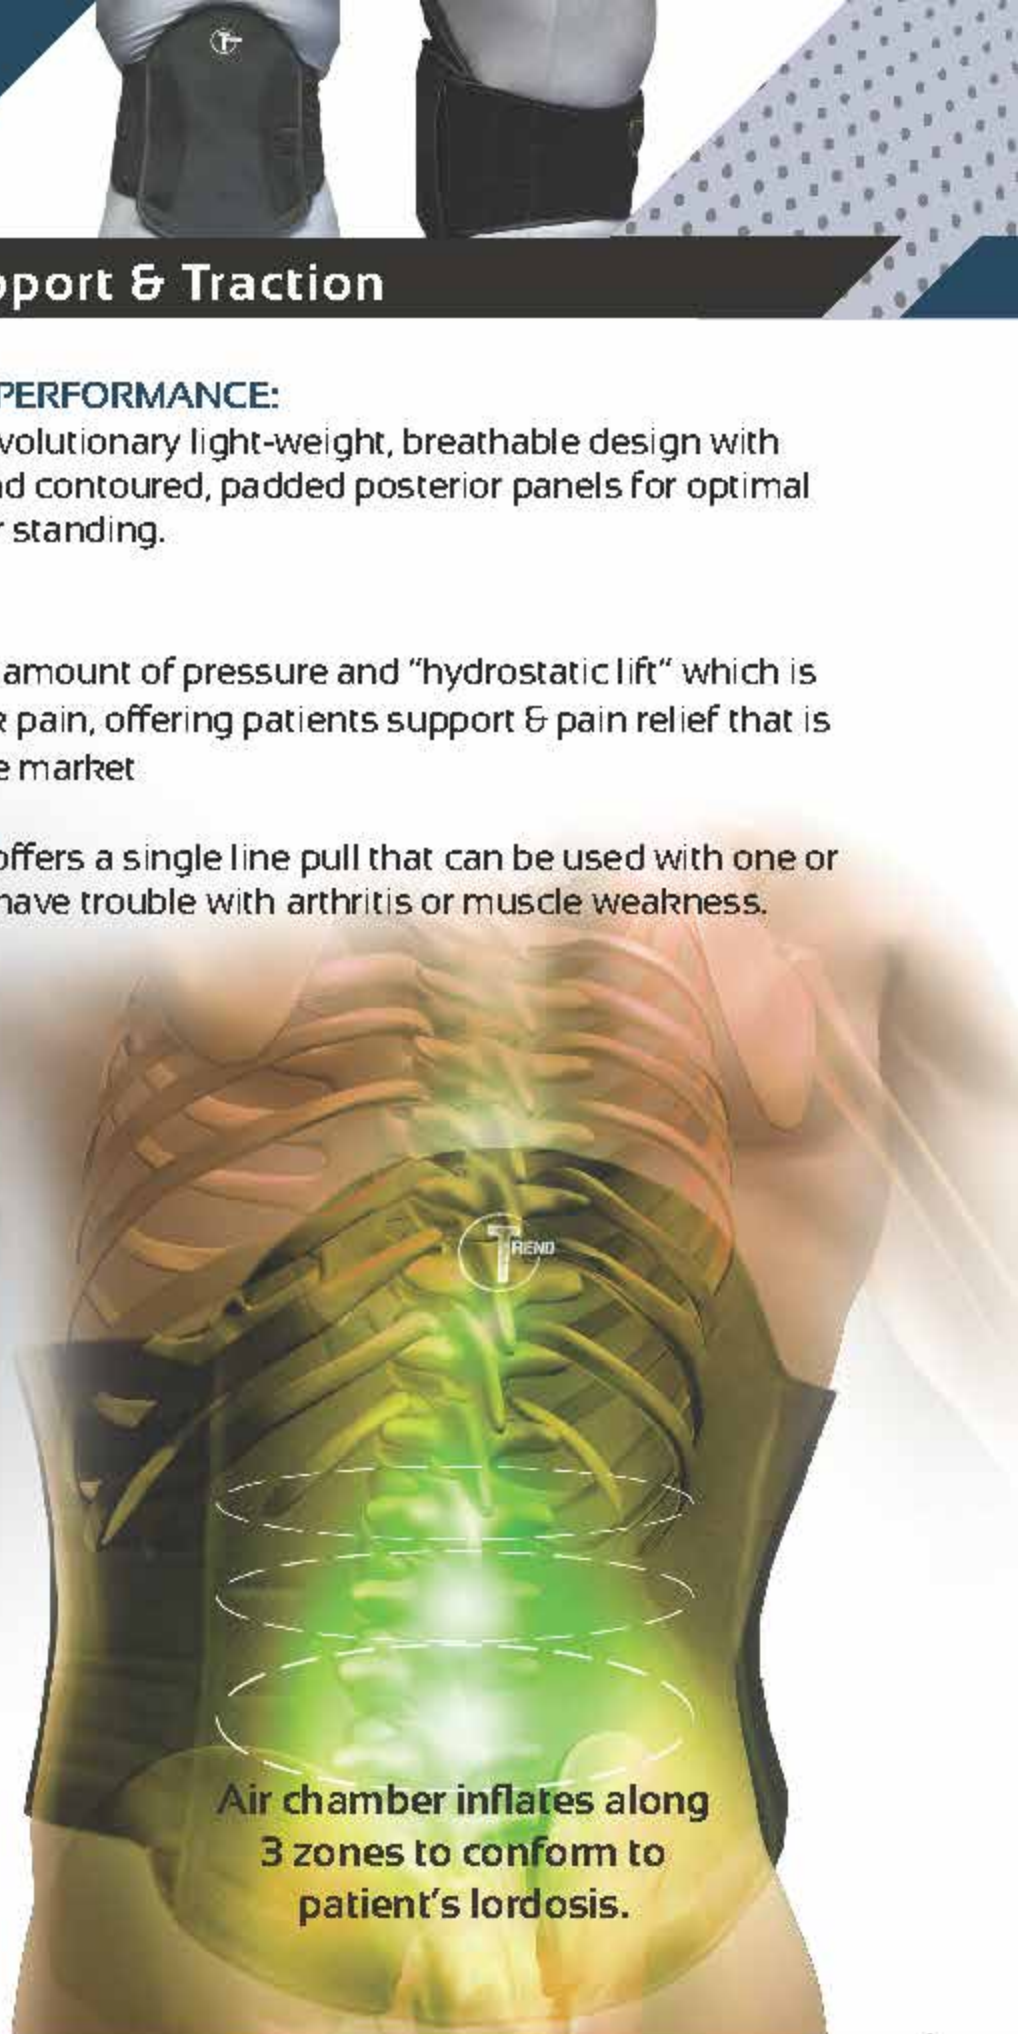

UNIQUE COMPRESSION SYSTEM offers a single line pull that can be used with one or both pull tabs to help patients who have trouble with arthritis or muscle weakness.

UNIVERSAL SIZING DESIGN

REVOLUTIONARY BUILT-IN AIR PUMP

Simple push valve
inflates chamber for
custom fit, comfort,
and support level

Air chamber inflates along
3 zones to conform to
patient's lordosis.

PDAC approved LO631 / LO648

Trend LSO (DCT-31)

The Trend LSO offers a revolutionary design that easily molds and forms to the patient's back. Like all of our models, it features the single or double pull simple compression system for the ease of use and for perfect tension and pressure. The design offers patients a comfortable and easy to use LSO and suppliers ideal performance and universal sizing for convenience.

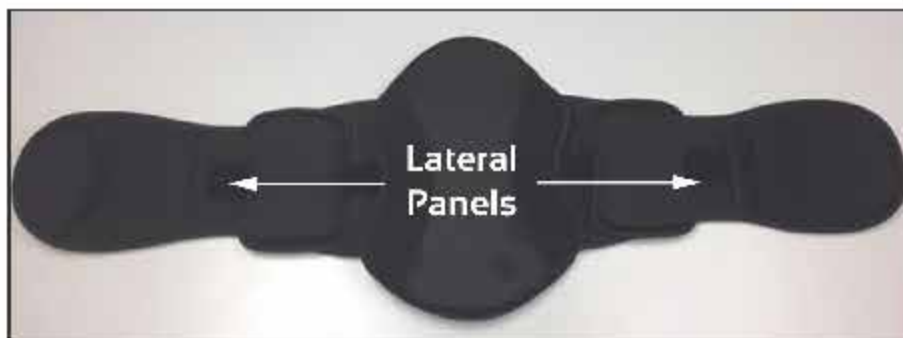

Available with or without a pump.

LO637 / LO650

All the features of the Trend LSO, but the Trend Pro (DCT-37) has added lateral panels for extra support.

Available with or without a pump.

Trend Pro (DCT-37) w/ Added Lateral Support

Trend Pro-FLEX (DCT-3750) Convertable Comfort

LO637 / LO650

The Trend Pro Flex offers the same features as the rest of the Trend LSO family, but with a modular design that allows the Pro-Flex to be an idea brace through multiple stages of recovery and various situations in life. The brace easily converts from a full LSO to a low-profile brace.

The modular design not only helps better fit patients, but also combined with the universal sizing - can make this an ideal brace to stock and reduce inventory for the supplier.

Spinal Support & Traction: Back Braces

Avalon-005 Scoliosis Bracing System

L1005

Advanced new scoliosis bracing system gives providers a great option for their patients with scoliosis. This brace offers a unique strapping and sizing system to easily adapt to each individual patient with ergonomically designed pulley system for easy compression adjustment.

INDICATIONS:

Designed for patients with Scoliosis. Promotes correct posture, relieves pain, and increases mobility.

L0627 / L0642

The **DCT-42U Trend Pro-Lite** is a one-size, extremely easy to adjust lumbar orthosis, that features an elastic support belt. This brace is very light weight, breathable, and offer excellent support and compression for any low back ailments.

The **Pro-Lite** is also an excellent option to use and a maternity support belt.

DCT-42U Trend Pro-Lite

DCT-5657 Trend Correx TL50

L0456/L0457

The **Trend Correx TL50** is the most innovative TL50 that has been brought to market in the past decade. It features an effortless sizing system with soft moisture wicking material and breathable zones throughout the brace. The most groundbreaking feature of the brace is a pulley mechanism that's attached to the shoulder straps which allows the brace to telescope freely without manipulating to the back of the brace like other TL50's. By having a pulley system attached to the shoulder straps allows the patient to apply the correct amount of force for optimal support. This system pulls the shoulders back and down to a neutral spinal position. Another feature of the brace is a movable chest strap, this allows the straps to be moved into position on the patient so it is not too high or low on the chest.

Aspen OTS Back Brace

L0637 / L0650

The Aspen OTS™ LSO 650 is a one-size adjustable, inelastic spinal brace featuring removable lateral panels that provide increased control for patients in need of additional support. This clinically-tested, non-narcotic, non-invasive treatment solution combines support and direct independent compression to promote effective trunk stability, enabling patients to resume activities of daily living. Comfortably fits waist sizes ranging from 28-54 inches, and up to 64 inches with Universal Extension Panel.

L0627/L0642

The DCT-2742 Trend LP offers a revolutionary design that easily molds to the patient's back. Like all of our models, it features the single or double pull simple compression system for ease of use and setting perfect tension and pressure.

The design offers patients an LSO that is easy to use and comfortable, while suppliers will find the universal sizing and performance an ideal convenience. This brace covers up to the L5 vertebrae.

DCT-2742 Trend LP

DCT-QF37 Trend Pro Quick Form

L0637 / L0650

The Trend Pro Quick Form is a one-size, extremely easy to adjust LSO. This brace is the ideal product for your patients who have trouble adjusting products themselves.

We have designed this product to go from 25"-60" with minimal effort. This brace is very light weight, breathable, and offers excellent support and compression.

Size: Universal (25"-60" waist) Available 8" Extension Panel

Spinal Support & Traction: Neck Braces

Aspen Cervical Collar

LO180

The **Vista® MultiPost Collar** is the latest addition to Aspen's award-winning line of Vista Cervical Collars. This new, fully-adjustable collar with pivoting occipital panels adds an extra level of support for greater motion restriction.

Like the original Vista Collar, the **Vista® MultiPost Collar** is one-size adjustable, virtually eliminating waste associated with collar sizing errors. It also features Aspen's proven cotton-lined pads designed to enhance skin care by reducing patient contact points in the occipital area.

LO180: PG180

NEW redesigned **Proglide Cervical Collar** offer superior immobilization in a comfortable, easy-to-use device as a complete solution to individuals who require the use of an extended wear collar. The unique height adjustment technology allows for customized fitting with a simple turn of the knob. With a one-size-fits-all design, this product reduces inventory stock.

FEATURES: 12 Height Adjustments with Ergonomic Knob Design adjustability, Pulley System Cervical Collar, Removable Thoracic Attachment, Soft Cloth Inner Liner, Tracheal Opening, and MRI, CT, X-Ray Compatible

Proglide Cervical Collar

PCT-100 Theratrac Cervical Traction

E0849 - Pneumatic

Cradles head and neck in the special vertically pneumatic head rest and inflates with over 30lbs of adjustable pressure to create cervical nerve traction, allowing the vertebral discs to realign, freeing the nerve root tissue from the pressure of the discs. Helps with "locked" neck muscles to slowly stretch and relax, allowing misaligned vertebrae to resume their normal supportive position.

Aspen Therapy Collar

LO180

Worn minutes a day in the comfort of home, the **Vista® MultiPost Therapy Collar** is designed to reduce symptoms associated with cervical conditions such as cervicogenic headaches, Forward Head Carriage and "Text Neck". Unnatural head positions can shift the cervical spine out of alignment, leading to radiculopathy, neuropathy and cervicogenic pain.

The **Vista® MultiPost Therapy Collar** promote an enhanced environment for healing by combining a pneumatic compression bladder that helps achieve cervical neutral with hot or cold therapy intended to reduce inflammation and muscle spasm.

LO174: PG174

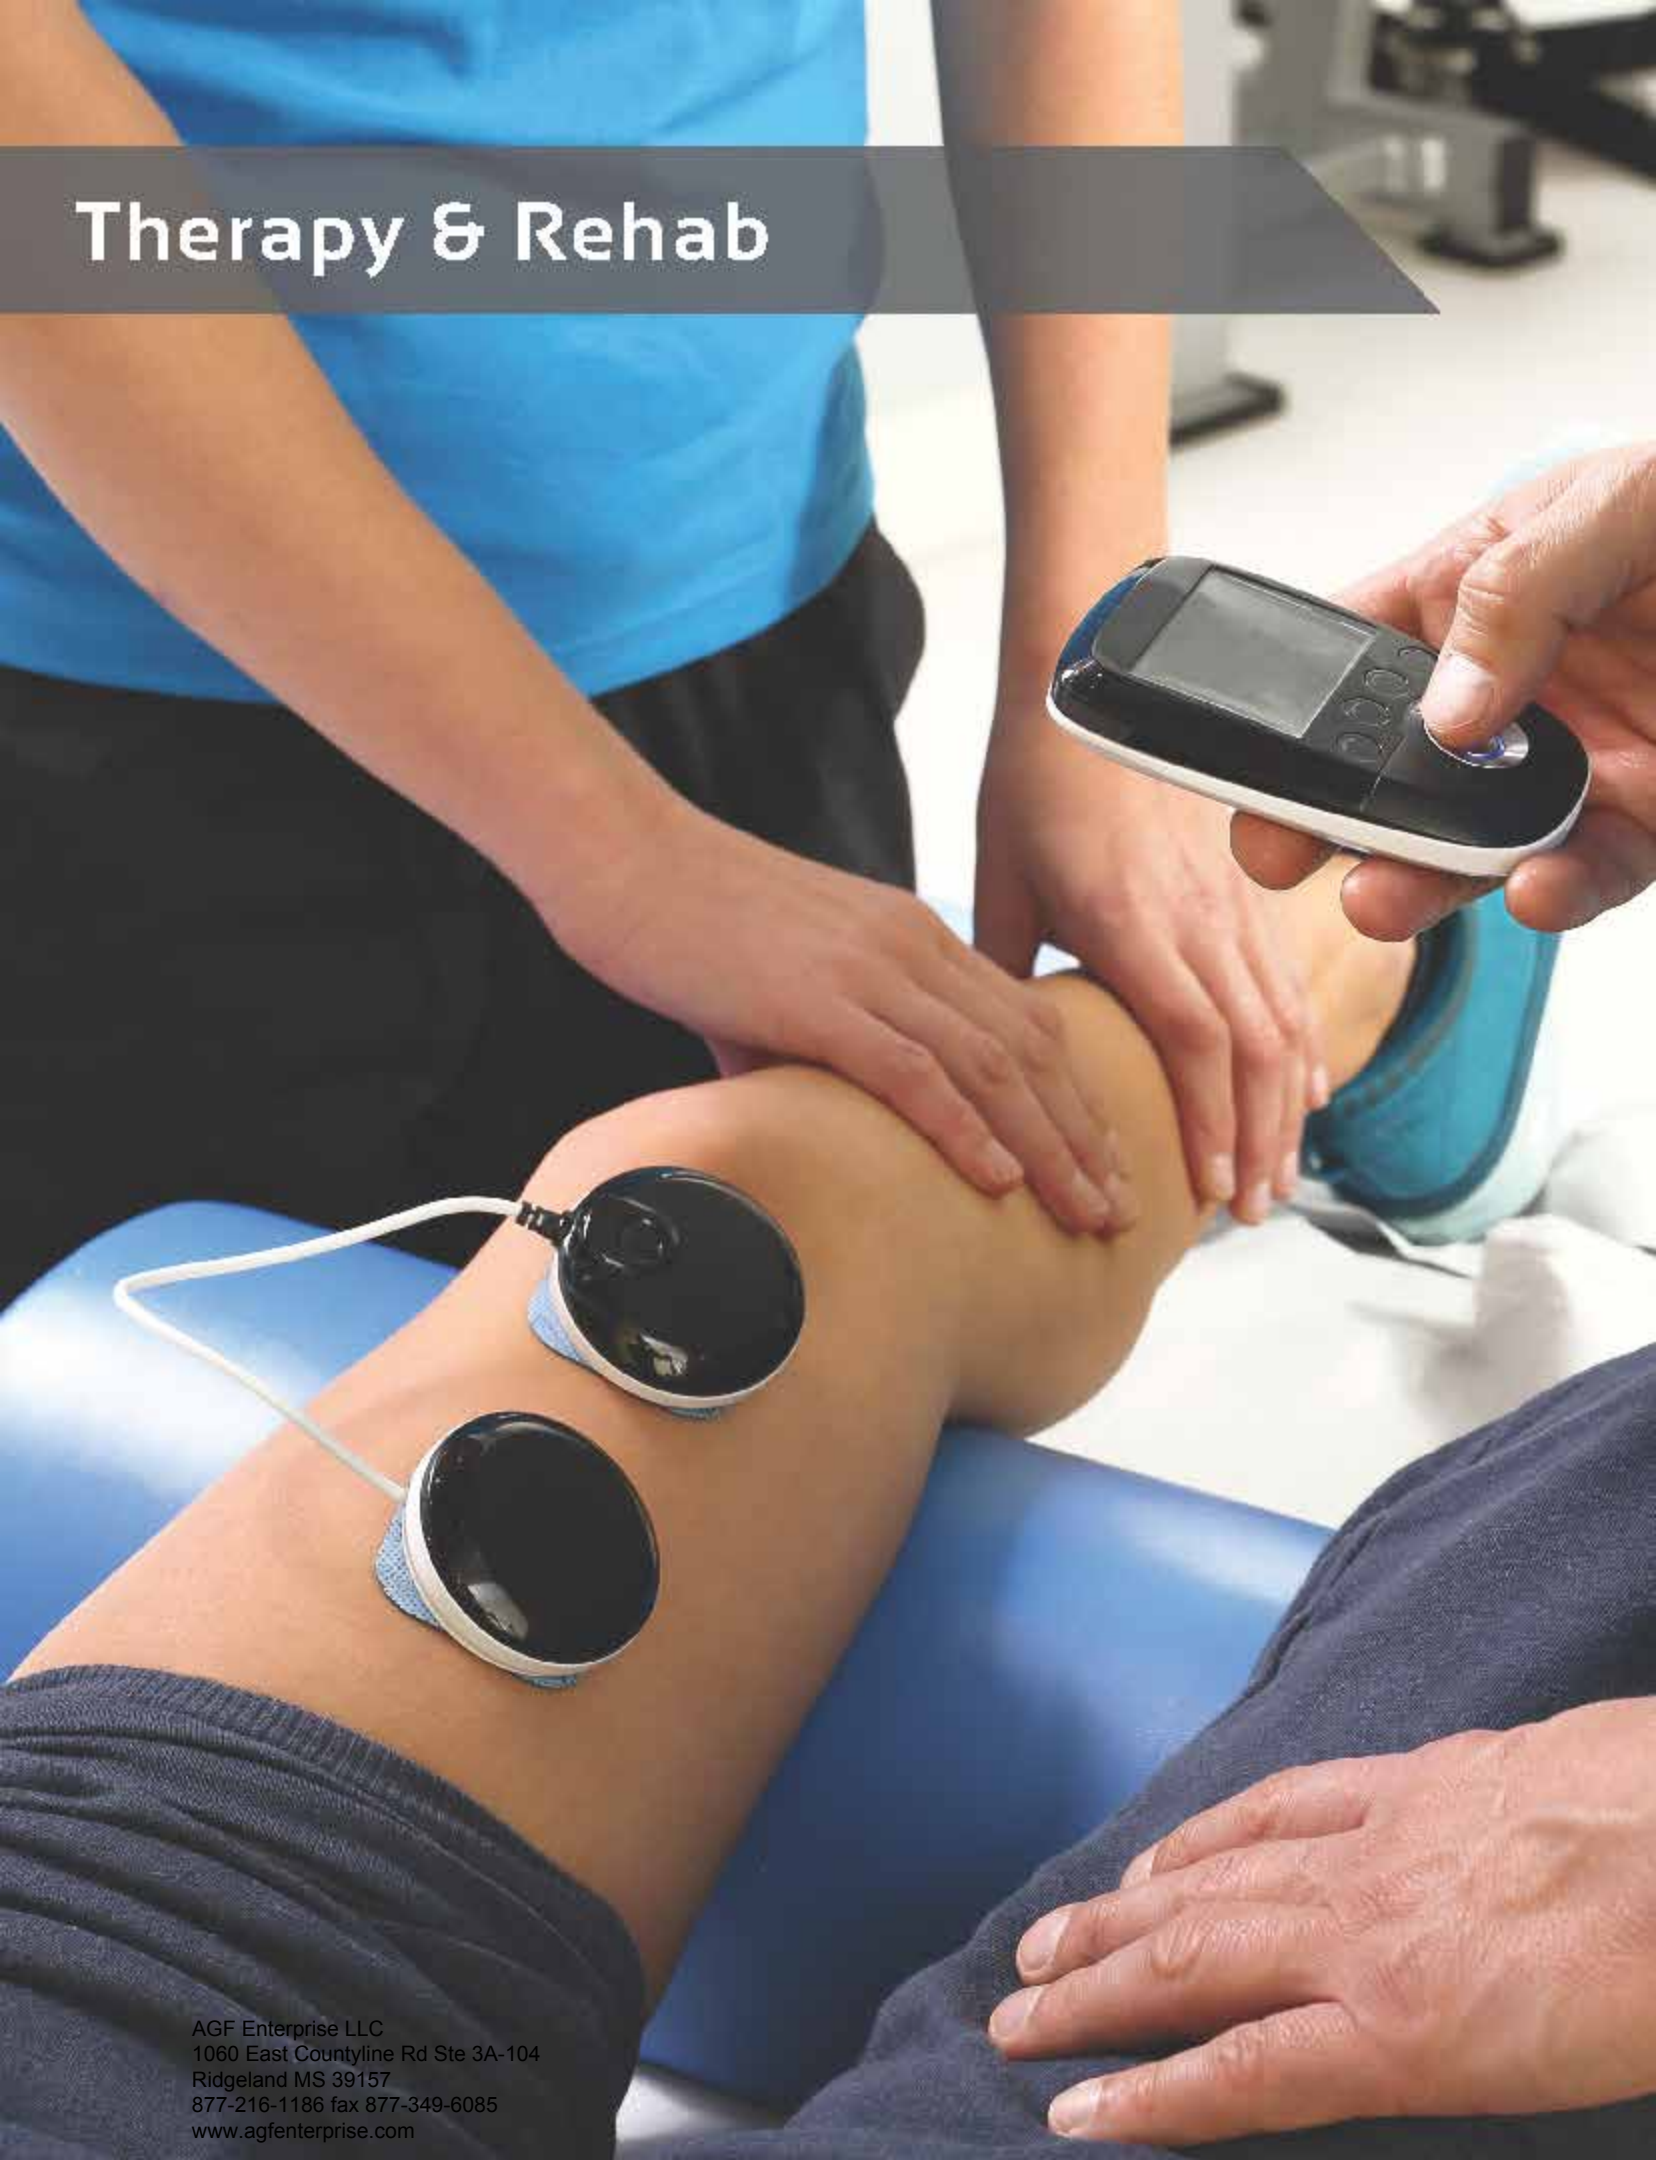

NEW redesigned **Proglide Cervical Collar** offer superior immobilization in a comfortable, easy-to-use device as a complete solution to individuals who require the use of an extended wear collar. The unique height adjustment technology allows for customized fitting with a simple turn of the knob. With a one-size-fits-all design, this product reduces inventory stock.

FEATURES: 12 Height Adjustments with Ergonomic Knob Design adjustability, Pulley System Cervical Collar, Removable Thoracic Attachment, Soft Cloth Inner Liner, Tracheal Opening, and MRI, CT, X-Ray Compatible

Proglide Cervical Collar

Therapy & Rehab

Therapy & Rehab

PlasmaFlow™

The **Manamed PlasmaFlow™** is intended to be an easy-to-use sequential compression system, prescribed by a physician, for use in the home or clinical setting to help prevent the onset of DVT in patients by stimulating blood flow in the extremities (stimulating muscle contraction).

HCPC: E0730

Dual-channel five-mode device with two wave form adjustments and a large LCD screen. The TENS nerve stimulator is a safe, drug-free way to lessen many kinds of acute (short-term) pain, like after surgery or an accident. Chronic pain (long-term), like arthritis, joint, back or muscle pain, or cancer pain may also be lessened with TENS electrotherapy device. Features 5 treatment modes, treatment timer or continuous use, adjustable pulse rate and wave form.

U5: Ultima 5 TENS Unit

U20 TENS

HCPC: E0730

TENS Neuromuscular Stimulator can be used for chronic nerve pain relief as well as pain associated with active or post-traumatic injury unresponsive to other pain therapies. Electrical nerve stimulation device is applied to the surface of the skin at the site of the pain. Features adjustable pulse width and frequency. Dual channel device with 20 modes of operation (8 manual/12 preset). Simple to operate and has a protective cover over the controls. Ready to use with 1 pack of free electrodes.

E0730/E0731

Superior to TENS and microcurrent therapy by narrowing the output parameters to target the relief of peripheral neuropathy in the hands and feet with vastly more advanced signals and precise auto-feedback loop that allows the Neuro to regulate the voltage based on different tissue masses. So the stimulator knows when it is treating a heavy set person, vs. thin. Also uses monophasic waveform typically associated with pushing and moving fluids – particularly effective in treating neuropathy pain - an effective, drug free, non-surgical relief of early onset Neuropathy.

UNEURO: Ultima Neuro
